Support	Description
Reconnaissance/assessment flights	Can only be requested thru the Netherlands Maritime HQ Carib (POC m.corveleijn.01@mindef.nl). A small unit is stationed on the airfield of Curacao. However, the availability and range is limited. Additional assets can be deployed from the Netherlands if required.
Assessment using satellite imagery	If and when available, we can assess satellite imagery.
Deployable survey teams	We have a military deployable survey team available. When deployed the Navy retains operational control. This deployable team can only operate when supported and protected by a Naval unit.
Production of interim-ENC	We have the capability to produce ENCs and AMLs in area on an ad-hoc basis.
Preparation of situational awareness maps	Our Maritime Environmental Information Center (MEIC) the capability to prepare situational awareness maps as part of a Rapid Environmental Assessment (REA).
