MACHC Chair
Deputy Director
NOAA Office of Coast Survey

From: Matt Borbash
Deputy Hydrographer of the Navy
Commander Naval Meteorology and Oceanography Command / CTG 80.7

Update for US Navy Survey Response:

Naval Fleet Survey Team was not ordered to deploy. They remain at Stennis Space Center. NAVO's Airborne Coastal Survey (ACS) Lidar based team is on standby in West Palm Beach, FL. However, we anticipate they will be redeployed to Stennis Space Center in the next 24-48 hours as it appears Bahamas will be using contract survey support.
